

Expand your vending opportunities!

With the dual temperature **Climate** joining its extensive product range, Crane Merchandising Systems continues to offer innovative vending solutions to the marketplace.

The Climate is flexible and versatile, both in machine configuration and range of products, offering operators a unique and compact vending solution which is ideal for smaller sites.

Machines are equipped with an adjustable divider which separates perishable foods and bottles from standard snacks and confectionery items. This health control feature allows food, snack, confectionery and bottled drinks to be offered from one single machine, maximising the vending opportunities for environments with limited space.

Flexible, dual temperature zones with health control

The Climate has been designed to meet the varying needs of today's busy vending environments and can help to provide a balanced range of snacks, chilled food and bottled drinks, promoting healthier products at education, business, hospital and leisure sites.

The Climate offers dual temperature zones. The lower zone can be configured to hold chilled food products along with standard bottles and is controlled by a temperature sensor which can be set between 2.2°C and 3.3°C with health control on (or between 2.2°C and 23.3°C with health control off). At the same time the upper zone, containing snacks and confectionery items, is stratified and will typically be set at 6°C to 9°C above the lower zone temperature when the lower zone is set with health control on.

The adjustable divider creates zones within the machine enabling the operator to create the specification most suited to the machine's location or user profile.

Enjoy a hunger busting snack or fresh food selection...

...along with a perfectly chilled bottled drink!

Climate machines are equipped with special, easy to load, bottle trays and spirals which optimise product presentation and delivery. The machine provides eight selections per tray and a capacity of 48 items.

The spirals are installed at a 45° angle, ensuring that the base of the bottle lands first in the cushioned delivery bin, guarding against damage to the machine and the bottle itself.

The Perfect Combination

Match the Climate with snack, food and drinks machines from the Crane Merchandising Systems range to create a total vending solution tailored to the needs of specific staff/customer preference or location.

Why choose Climate?

- Dual temperature zones separated by adjustable divider shelf
- Divider shelf can be moved to create the specification best suited to the machines location
- Lower zone controlled by a temperature sensor and features configurable health control
- **SureVend™** guaranteed product delivery system fitted as standard
- Machines can help to provide a healthy vending option for schools, sports centres, canteens etc
- Machines are equipped with special bottle trays and spirals to optimise product presentation and delivery

Designed for today's busy vending environments!

C·L·I·M·A·T·E

SureVend™ Guaranteed Product Delivery

The SureVend™ product delivery feature guarantees that selected items are delivered to the customer or their money is returned. The system works by attempting to deliver the product up to 3 times. Optic sensors detect whether the selected item has been delivered; if a product is not dispensed after 3 attempted vends, the customer is given the option of selecting another product or accepting a refund.

Price Rolls

- Innovative price roll system allows for easy price changes
- Operator simply rolls the price strip until correct price is displayed

Audit Information

- Audit system records sales information, aiding stock control and machine management
- Information can be viewed via the machines display panel and printed using a hand-held printer

Choice of Payment Systems

- Climate is compatible with the leading M.D.B. and Executive coin and cashless systems
- Either option can be fitted depending on the payment format required

Dual Spiral System

The well proven, dual spiral vending system fitted to snack and food trays is reliable, easy to adjust and suitable for a wide variety of products. The spirals gently but firmly support the products and smoothly move each item forward to the vend position.

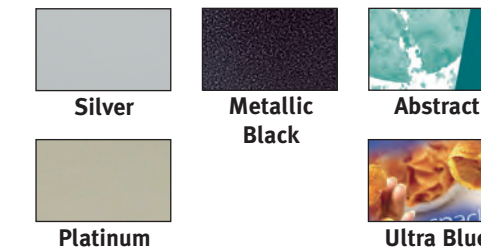

The machine is quick and easy to restock with trays that tilt to 45°. This feature ensures that even the top shelf is within easy reach.

Dual Temperature Merchandiser

product vending has never been so flexible

Visual Style To Enhance Any Location

The Climate is available as standard in a choice of three paint colours to complement machines available from the Crane Merchandising Systems range.

When matched with Abstract, Ultra Blue or Grey graphics, these machines provide visual and aesthetic impact to any location.

healthy fresh

With increasing numbers of people analysing their lifestyle and choosing more healthy alternatives to traditional chocolate bars, crisps and fizzy drinks, the Climate provides the perfect solution for providing healthy alternatives into schools, colleges, leisure centres etc.

Crane Merchandising Systems recognise the need to encourage healthier eating and drinking habits and 'healthy fresh' branded machines provide the perfect 'one stop' solution.
