

KLIX® 450

Good things come in small packages

Our most compact drinks system, the KLIX 450, proves that less is more. It sits neatly on a tabletop yet offers a generous 400-cup capacity and eight drinks selections.

Quick, simple and easy to use, you can put the KLIX 450 just about anywhere.

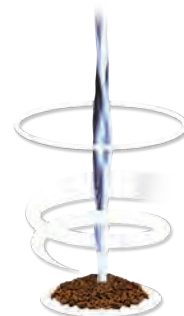

At KLIX we've harnessed the power of cutting-edge technology to pioneer an in-cup system that ensures consistent product quality, unsurpassed machine reliability and simple, flexible systems that can be tailored to your individual needs.

The last thing you want to be doing is cleaning or repairing your vending machines. We seal exactly the right amount of ingredients from market-leading brands such as Nescafé® Gold Blend® and PG Tips®, into every cup. This keeps all the flavour and guarantees the quality of every drink.

Technology that delivers a lot, but asks less of you.

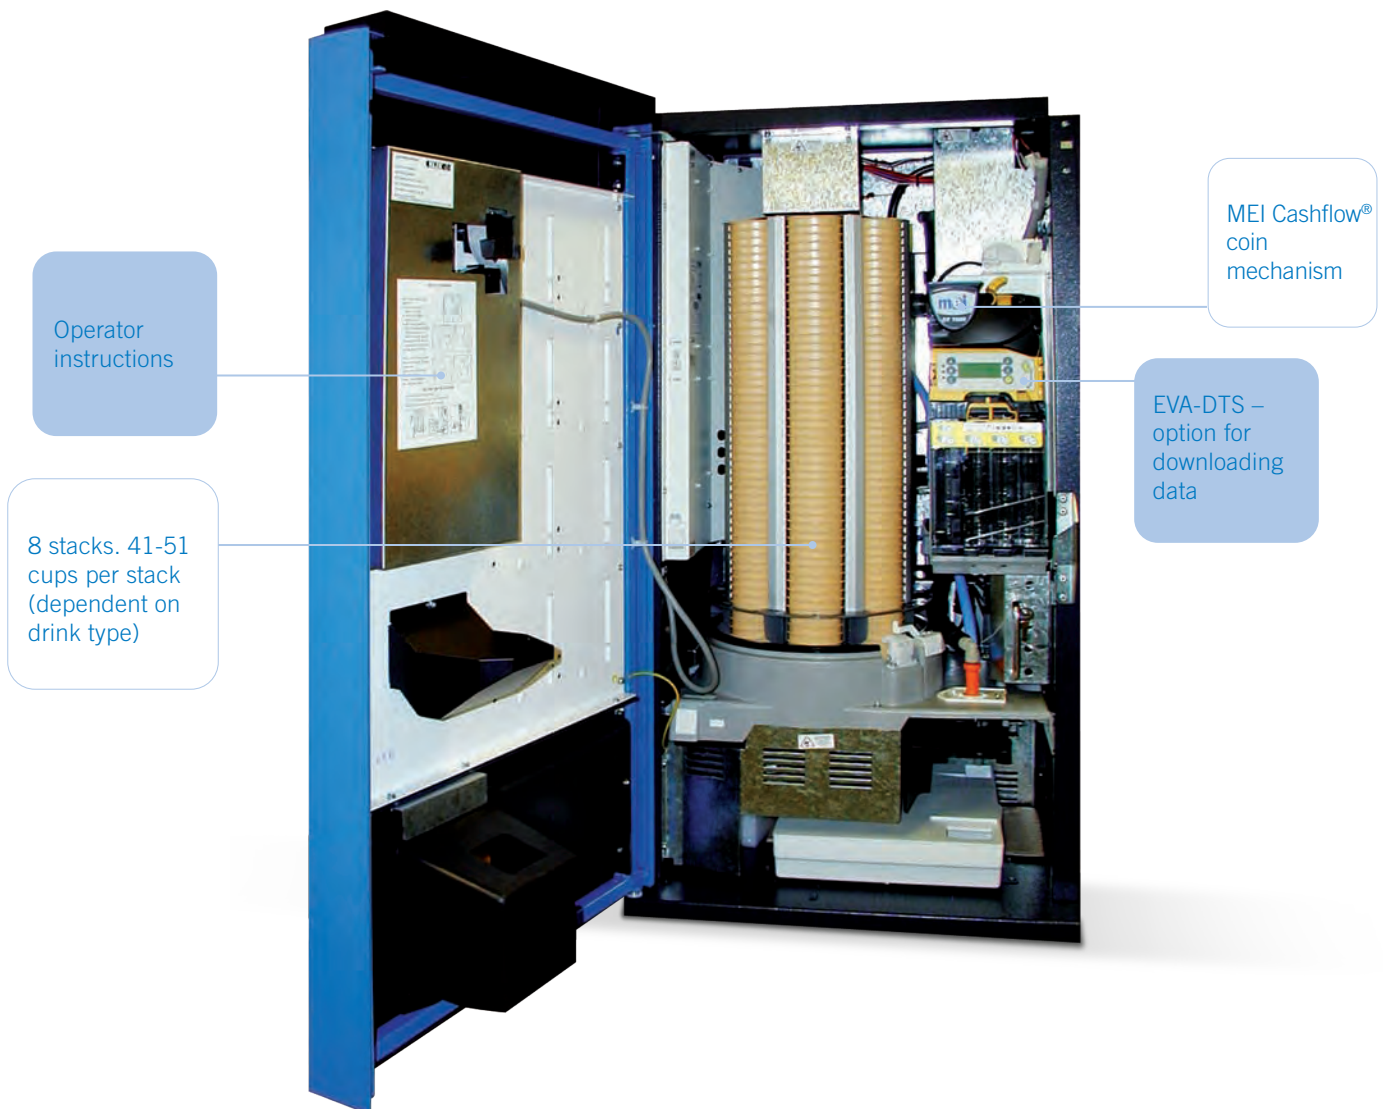

KEY FEATURES:
