

Easy5000

AROUND THE CLOCK
SNACK & FOOD SERVICE

Introducing the Easy5000

Faster, easier, more thoughtful approach to snack & food vending

The Easy5000 is a drum merchandiser with a difference. Why waste time in the frustrating search for snack and food selections when you can have two-way rotation of individual drums for a faster, easier and an overall more thoughtful approach to product selection. Innovative multi-drum pricing also means you can have a wider choice of products with up to three selling prices per drum rather than simply offer "more of the same" because all the prices need to be same.

The EASY5000's total temperature control system with superior insulation and refrigeration mean that variation in cabinet temperature is minimal in conditions of up to 32°C and 65% humidity - and that's hot! For extra peace of mind the machine is able to monitor product shelf life and includes a health control thermostat that prevents selections being made should the temperature rise above a pre-determined level.

Solo Encore LX, Azure Water Dispenser & 10 drum Easy5000 for a round the clock service!

Other features include:

- 8 Drum model perfect for front-facing sandwich wedges or
- 10 drum model offering higher item capacity
- Machine temperature maintained between 3 & 5°C
- Intelligent merchandising - ensures drums are automatically positioned to show the maximum number of products
- Intelligent loading records date of stocking and monitors shelf life to ensure only fresh items are vended.
- Drums can be locked off for 'out-of-hours' use - perfect for night shifts
- FIFO (first in/first out) selection system to ensure products are dispensed in order of loading (programmable)
- Power vend door reduces risk of vandalism and product tampering (safety feature also ensures hands cannot be accidentally trapped)
- Illumination from both sides for attractive product presentation
